

UV Angel Adapt

Protect your staff and facility from infection 24 hours a day, 365 days a year, with UV Angel Adapt.

Using automated UV-C light, UV Angel Adapt continuously senses when keyboards, monitors and other high-touch surfaces have been used, safely treating them hundreds of times a day. The moment a potential threat is detected on surfaces, UV Angel Adapt neutralizes it at rates greater than 99%.

Studies show the presence of infectious pathogens on 1 in 4 frequently touched surfaces. Reduce the risk of spreading viruses and bacteria with UV Angel Adapt - an intelligent automated UV-C device that safely and continuously detects and neutralizes surface contamination.

Use UV Angel Adapt with every shared keyboard, tablet, touch screen monitors and phone in your facility.

24/7

Continuously monitors keyboards and other high touch surface items

Safe

Disinfects hundreds of times a day with no risk to equipment users

Effective

Proven to be greater than 99% effective against bacteria, fungi and viruses

Features

- Kills over 99% of UV-C exposed bacteria and pathogens
- Continuous 24 hour protection
- Suitable for shared keyboards and touch monitors
- AI technology detects typing and manual cleaning
- IOT connectivity onboard - WiFi and BLE
- Manufactured in the USA
- 2 year warranty
- Dimensions 6" x 4" 1" - Weight 0.2 lb
