

Swift UV

Meet the newest member of the iCleanse family of chemical-free UV-C disinfection stations — the Swift UV.

The Swift UV disinfects your phone in 15 seconds killing pathogens like the common cold, influenza and human coronavirus, which can live on surfaces for up to 28 days. Pair the Swift UV with the optional hand sanitizer mount to ensure there is no recontamination after your phone has been disinfected.

The iCleanse Swift UV is the easiest way for businesses to stop the spread of viruses amongst employees and customers. By disinfecting our smartphones, we help break the cycle of acquiring and passing along viruses. iCleanse uses Crystal IS Klaran UV-C LEDs that emit deep ultraviolet light to target and effectively eradicate viruses.

Install Swift UV in your facilities today - the fastest and most powerful disinfection solution for mobile devices.

Fast

Rapidly disinfects any smartphone in as little as 15 seconds
