

abUV 2x2

Safe for use in occupied spaces the abUV™ LED fixture provides continuous UV-C Room Air Disinfection.

abUV™ is engineered to kill at least 99.9% of airborne pathogens such as mold, bacteria, and viruses including SARS-CoV-2. It's steel troffer body offers a solid, reliable installation. The abUV™ troffers are available in 2'x2' and 2'x4' configurations and provide top-of-the-line lumen output plus low maintenance and a tube-based, sustainably designed fixture.

abUV™ is the ultimate integrated lighting and disinfection system for post-coronavirus public spaces, be it hospitals, schools, offices, retail stores or public assemblies.

Use abUV™ to simply replace existing fluorescent or LED fixtures and wall switches

Safe
