

UV Angel Air

Protect employees and guests in your facility from infection 24 hours a day, 365 days a year with UV Angel Air.

Safe for use in occupied rooms, UV Angel Air is proven to eliminate 99.99% of bacteria and viruses in the air. Each unit protects 150 square ft and disinfects 50 cubic ft of air per minute. Lab tests show elimination rates approaching 100% against more than 80 serious disease-causing pathogens.

UV Angel Air is unobtrusive, and with its innovative in-ceiling design, maintains valuable floor space in the workplace. UV Angel Air is suitable for schools, hotel rooms, healthcare facilities or any location where clean air is vital.

Use UV Angel Air to replace ceiling panel fixtures ensuring every 150 square feet is protected by a unit.
