

# Cubby+

360 degree UV-C disinfection protection for phones, tablets, wallets, keys and everyday high touch items.

Until now, there has not been a practical option to sanitize everyday items like laptops, cell phones, tablets, pens, name badges, wallets, baby pacifiers, toys, etc. With Cubby +, simply lay items on the transparent shelf and let bacteria-blasting light get to work. UV-C light is emitted from all directions and kills greater than 99.99% of the most problematic Hospital Acquired Infections (HAIs) in under 60 seconds.

Clinically proven, Cubby+ patented dosimeter technology measures the UV-C level to ensure delivery of the precise amount of light required to destroy infectious agents.

Use Cubby+ to disinfect everyday items being walked into the workplace, placing units at all entrance points.

## Fast

Delivers a full disinfection cycle in less than 60 seconds

## Trusted

Used by Marriott Hotels, Delta Airlines and many hospitals

## Effective

Proven to kill 99.99% of dangerous pathogens

## Features

- 99.99% effective in killing harmful viruses
