

UV Wand

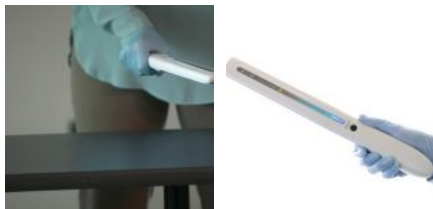

The only UV Wand on the market proven to kill 99.9% of SARS-CoV-2 on surfaces in under 5 seconds.

This touchless state-of-the-art disinfecting wand uses ultraviolet light waves to destroy harmful microorganisms. Tested and verified by independent testing laboratories to destroy viruses, bacteria and mold in seconds. Just pass the hospital-grade UV light wand over a surface and the emitted UV-A and UV-C light waves eliminate dangerous pathogens.

Reduce your overall cleaning supply expense and the presence of harsh, potentially toxic cleaning chemicals by using this UV wand for an environmentally safer, more effective solution.

Use UV Wand to regularly disinfect surfaces and protect your home, office and classroom against infection risk.

Powerful

High output LED's
10x more effective
than other wands
