

The nUVo™ portable UV-C air disinfection device provides powerful, continuous air disinfection and enables easy transport between rooms.

With an enclosed UV-C chamber, nUVo™ can achieve five air changes per hour in a 200-square-foot room. nUVo™ doesn't need filter changes and the easily replaced UV-C lighting module lasts over 10,000 hours - that's over 2 years if used 12 hours per day on average.

nUVo has 4 fan speed settings and weighing in at just 17 lbs is easy to move around your home, classroom or office.

Use nUVo™ in rooms where clean air is critical and circulation is difficult to achieve.

Portable

Easy to move around a facility and deploy in newly occupied rooms

Powerful

Delivers up to five air changes per hour in a 200 square-foot room

Effective

Kills 99.9% of airborne pathogens and viruses including SARS-CoV-2
