

The iCleanse Swift is a convenient and easy to use, chemical-free UVC disinfection station.

Designed for maximum exposure, iCleanse's patented technology applies consistent germicidal light to 99% of the surface area of the item you place in it. In as little as 30 seconds, iCleanse units effectively kill 99.9% of infectious pathogens like influenza, the common cold and coronavirus.

Each Swift unit is equipped with a graphical user interface to easily start a disinfection cycle or make customizations in the settings. For every set of lamps, there are 4,000 cycles and a warning indicator when it's time to reorder. Easily customize your Swift units disinfection time - 30 seconds for common pathogens and 120 seconds for spores.

iCleanse Swift is perfect for disinfecting multiple mobile phones, tablets, ID badges, body cams, CB radios and more.

Customizable

Customize disinfection times for different pathogens and spores

Fast

Disinfect pathogens in as little as 30 seconds, 120 seconds for spores

Effective

Kills 99.9% of infectious pathogens like the flu and coronavirus

Features

- 99.9% effective in killing harmful viruses
- Lamps deliver 4,000 cycles
- Warning indicator for lamp replacement
- Portable
- Patented design
